EDUCATION

Stony Brook University

Bachelor of Science in Information Systems

May 2026

Stony Brook, NY

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML, CSS, C++, C

Web Tech: Node.js/Express, React, FastAPI, Vite, Flask, Django, Angular, Vue, Next.js, Vercel, Render

Data and ML Tech: MongoDB, SQL, PostgreSQL, MySQL, Supabase, Pandas, Scikit-learn, Numpy, PyTorch, TensorFlow

Technologies: Git, AWS, Postman, Docker, Kubernetes, Linux, Firebase

Certifications: AWS Certified Cloud Practitioner

EXPERIENCE

Stony Brook University (MARCOM Department)

Sept 2024 – May 2026

Front-End Web Development Intern

Stony Brook, NY

- Engineered responsive, high-traffic web applications using HTML, CSS, JavaScript, and Bootstrap, improving accessibility and usability for **40,000+ monthly users** across **5+** university web platforms.
- Designed **15+ reusable CMS components**, reducing redundancy **30%** and improving efficiency across all department sites.
- Implemented WCAG 2.1-compliant accessibility standards, improving cross-device consistency and contributing to a **20%+ improvement** in page usability scores across audited pages.

REBNY

Jul 2024 – Aug 2024

Software Engineering Intern

Manhattan, NY

- Constructed a full-stack AI-powered chatbot using Python and the OpenAI API, reducing inbound support tickets **25%** and saving **47+ hours** of manual inquiry handling over **2 months**.
- Created a RAG pipeline using historical FAQ datasets, decreasing response time **35%** and improving answer relevance.
- Collaborated in an agile environment to develop and iterate on features, authoring technical documentation that improved onboarding efficiency and long-term maintainability.

PROJECTS

Bread | *Plaid, React, Node.js/Express, MongoDB, Python/FastAPI, Redis, Docker, AWS S3, Numpy, Scikit-learn*

Jul 2026

- Delivered a finance app that pulls and auto-categorizes bank transactions, spanning **27 REST endpoints** across **4** containerized services, via incremental **Plaid** sync and pre-signed **AWS S3** uploads.
- Shipped a machine-learning **microservice** that forecasts spending, flags anomalies, and sorts transactions into **16 categories** through TF-IDF classification, gradient-boosted quantile regression, and robust z-scores.
- Streamlined repeated ML and exchange-rate computation with Redis TTL caching, and guarded endpoints against overload with rate limiting and **204 Jest/pytest tests**.

LiftSafe (*HopperHacks 2026*) | *Python, TypeScript, React, OpenCV, GeminiAPI, ElevenLabs, Google Mediapipe*

Feb 2026

- Built a real-time computer vision system using OpenCV, MediaPipe, and React, delivering live fitness form correction with multi-language voice feedback for **50+ test users**.
- Optimized pose detection pipelines using multi-threading and angle smoothing, achieving **<100ms latency** and **92% pose detection accuracy** during testing.
- Built a **parallel** pipeline converting **30+ FPS** video into ElevenLabs audio feedback, cutting delay **40%** vs. sequential calls.

Chatty | *React, Node.js, Express, MongoDB, Tailwind*

Jul 2025

- Developed a full-stack real-time communication platform for **100+ active users**, supporting chat and video functionality.
- Improved performance by caching with TanStack Query, reducing API refetch time by **35%** for returning users.
- Secured user sessions with JWT and Bcrypt, integrating GetStream API for real-time messaging at **<200ms latency**.

LEADERSHIP

Theta Tau Professional Engineering Fraternity

Nov 2023 – Present

Web Development Head

- Led a team of **4 engineers** to develop a scalable web platform using **MERN tech stack**, supporting **50+ active members**.
- Architected a reusable component library with mobile-first breakpoints, replacing duplicated CSS across **12+ pages**.
- Ran **Agile 2-week sprints** with standups, backlog grooming, and **code reviews**, cutting feature delivery time by **25%**.
